Profile

Engineer at heart. Been tinkering with Linux since I was a kid, and never stopped. Today I build platforms that development teams can rely on. Stable, secure, scalable.

Bridging infrastructure and business: translating technical complexity into solutions that actually deliver value. Hands-on with AWS, Kubernetes, OpenShift, Terraform, Python, Golang and Bash. From startup to enterprise, from greenfield to migration. No powerpoints, just working systems.

Skills

Container Technologies	Kubernetes, OpenShift (ROSA, ARO & On-prem), EKS, K3s, Docker
Favorite Cloud	AWS
Infrastructure as Code	Terraform, AWS CDK, CloudFormation
CI/CD & GitOps	ArgoCD, GitLab CI, GitHub Actions, Tekton
Programming & Scripting	Python, Golang, Bash
Data & Messaging	PostgreSQL, Kafka, RabbitMQ, Redis

Experience

Freelance Platform Engineer Sep 2024 – Present
MrContainer (Own Business) Almere

- Started own freelance business building cloud-native platforms on AWS, Kubernetes and OpenShift

Platform Engineer Jul 2025 – Present
Royal Schiphol Group (via MrContainer) Amsterdam

- Part of the container platform team, driving lifecycle management and platform elevation
- Migrating OpenShift to a newer version across on-premise and Azure environments
- Helped onboard new teams onto the platform
- Technologies: OpenShift, ArgoCD, Terraform, Azure DevOps, Prometheus, Grafana

Lead Platform Engineer Oct 2024 – Jun 2025
NXLog (via MrContainer) Remote

- Led team of 4 engineers, driving containerization initiative for scalable deployments on AWS and on-premises (VMware, Hyper-V)
- Built out AWS Landing Zone with AWS Control Tower and developed new SaaS platform on EKS
- Technologies: ArgoCD, Kyverno, Longhorn, GitLab CI, Terraform, K3s, Vault, ClickHouse, Ansible

Kubernetes Practice Lead Oct 2023 – Sep 2024
Nordcloud, an IBM Company Amsterdam

- Led team of 11 consultants delivering Kubernetes and OpenShift solutions across Europe
- Developed standardized offerings for Red Hat OpenShift, EKS, GKE and AKS, driving containerization adoption
- Directed greenfield and brownfield projects; presales solutioning to delivery management

Senior Cloud Architect Nordcloud, an IBM Company	Aug 2018 – Oct 2023 Amsterdam
--	----------------------------------

- Senior consultant of the global Kubernetes practice; container platforms and cloud migrations
- Mentored junior consultants and delivered internal training on Kubernetes, AWS and DevOps practices
- Delivered AWS Well-Architected Reviews for Hema, FerroAmp, Finnair, SSH.com
- Delivered 2-week hands-on cloud workshop for TSYS (Cyprus)
- Consulted across finance, retail, manufacturing and technology sectors

Platform Engineer the LEGO Group (via Nordcloud)	Nov 2021 – Sep 2023 Remote
--	-------------------------------

- Stabilized on-premise Kubernetes (Rancher/RKE); engineered new OpenShift-based container platform
- Established Managed Services team: Postgres, RabbitMQ, Redis-as-a-Service for development teams
- Migrated several workloads from RKE to OpenShift using ArgoCD and Github Actions
- Technologies: OpenShift, Rancher, Prometheus, Grafana, Loki, GoLang, Python, Terraform, Kyverno

AWS Cloud Engineer SKF Group (via Nordcloud)	Feb 2021 – Oct 2021 Remote
--	-------------------------------

- Developed serverless platform on AWS for ball bearing calculations using Lambda, API Gateway and DynamoDB

Cloud Architect Finnair (via Nordcloud)	Oct 2020 – Jan 2021 Remote
---	-------------------------------

- Delivered Well-Architected Review for Finnair
- Re-architected and migrated key workloads from on-premise to AWS using CDK and CloudFormation

AWS Cloud Engineer Bizzdesign (via Nordcloud)	Sep 2019 – Feb 2021 Remote
---	-------------------------------

- Architected multi-tenant Kubernetes platform on EKS; containerized core platform components
- Technologies: AWS CDK, EKS, ArgoCD, CloudFront, Route53, Prometheus, Grafana, Loki

GCP Cloud Engineer IJsvogel Retail (via Nordcloud)	Oct 2018 – Dec 2019 Remote
--	-------------------------------

- Containerized Magento e-commerce platform on GKE
- Delivered technical training and workshops

DevOps Engineer / Full Stack Developer Simacan B.V.	Jun 2014 – Jul 2018 Amersfoort
---	-----------------------------------

- DevOps (2016-2018): Led DevOps team, 24x7 on-call; migrated Heroku to AWS
- Developer (2014-2016): Built Simacan Control Tower and ANWB Traffic Information platform
- Technologies: AWS, ECS, Docker, Terraform, Kafka, Postgres, Python, Bash

Software Developer CRESPO software & tools	2012 – 2014
--	-------------

- Developed real estate portal in SharePoint 2010 with C#, ASP.NET and SQL

Education

Bachelor's Degree, Computer Science 2009 – 2013
[Saxion Hogeschool Enschede](#)

Certifications

Active: AWS Solutions Architect Professional (2024)
Previously: AWS Security Specialty, AWS DevOps Pro, GCP Cloud Architect

Projects

Homelab – Turing Pi cluster running K3s. Self-hosted services, GitOps and automating things that make life easier.
